

Williamsburg Environmental Group, Inc. (WEG)

The company was founded in 1990 and has grown from two partners to a present staff of more than one-hundred professionals in four offices across Virginia as well as an office in Florida. This move represents a milestone for WEG. As owners of this beautiful new building, it is hard to imagine starting out in a garage, but that's exactly where WEG was born. Principals, Ron Boyd, Michael Kelly, and Dave Ramsey, have maintained their dedication and determination and look forward to continued growth and success. "We can remember a time when we had one client and only a vision of where we wanted to be. We are happy to say that we still have that client and have exceeded our vision."
