

## LID Retrofit Environmental Excellence Award for Construction

In conjunction with The Northern Neck Planning District Commission (NNPDC), Williamsburg Environmental Group, Inc. (WEG) received the Ecological Excellence Award for Construction, sponsored by the Virginia Chapter of the Soil and Water Conservation Society. WEG assisted The NNPDC in developing the project concept, preparing the grant application, designing of the proposed retrofits, bidding assistance, and assistance with construction inspection, development of project signage, and participated in a training/educational seminar on LID retrofit measures. The project was completed on time and under budget. At the Virginia Association of Soil and Water Conservation Districts Annual Winter Meeting, W. Douglas Beisch, P.E. and Daniel Malone of WEG, along with NNPDC representatives, were there to accept the award. "It's been an exciting project for WEG these past months and we are very proud to have The NNPDC and WEG's hard work recognized in such a way," commented Beisch.
